

Power Clean Out

Condenser High-pressure Cleanser in Aerosol Can (750 mL)

POWER CLEAN OUT is the right solution to clean condenser, even when they are located in difficult position. **POWER CLEAN OUT** has been designed to obtain a constant and high supply of pressure. This facilitates the removal of the dirt, which is accumulated in between the plates. The high pressure works with **POWER CLEAN OUT** cleaning action, in order to increase its efficiency, without wrecking the materials with aggressive substances. Its powerful spray reaches elements even at some meters of distance and represents a perfect substitute when you cannot use the pressure washer. No need to rinse.

Instructions: Shake before using it. In case of close treatments, keep yourself 30 cm far from the unit to clean, with a grade that avoid the bounce of the product. Spray in small and consequential jets. In case of heavy dirt, wait 30 seconds and spray again. Spray generously and repeat the operation one minute later.

POWER CLEAN OUT must be used by experienced professionals, provided with the specific personal protective equipment. Do not rinse. Pressurized Can: do not approach free flames. Do not expose to heat sources.
