

## Rolling Tool Box Storage System

Rolling Tool Box Storage System is constructed with impact-resistant polymers and metal-reinforced connectivity to withstand harsh jobsite conditions.

The tool storage solution connects with 3 independent tool boxes via integrated locking cleats and has a totally 110L loading capacity. It allows you to customize and build your storage system to easily transport and organize your HVAC tools, equipments and accessories.

An IP65-rated weather seal protects tools and accessories from rain and other jobsite debris. The interior organization tray keeps your equipment organized to fit your needs. So it is the industry's most durable and versatile storage system.

## Rolling Tool Box Storage System
